

# How to Read

## Location Lists

The **Location Lists** tool provides a CSV file of locations within a trade area, depending on the chosen data source. Data source variables can be selected to be included in the output file.

The selected data source variables are represented as columns in the CSV output.

	A	B	C	D	E	F
1	Business name	Employment for this location	Sales for this location	AreaName	DistanceMiles	Direction
2	Eager St Academy	20	530000	Baltimore, MD (City)	0.044618007	E
3	Baltimore Detention Center	870	530000	Baltimore, MD (City)	0.044618007	E
4	Abba Bail Bonds	3	343707	Baltimore, MD (City)	0.050557588	NE
5	ATM	0	0	Baltimore, MD (City)	0.052198369	E
6	Gowda, Bharathi MD	3	192000	Baltimore, MD (City)	0.055021802	E
7	Executive Health LLC	6	524000	Baltimore, MD (City)	0.075671974	SW
8	Steven Scott Gallery	1	148000	Baltimore, MD (City)	0.081971172	SW
9	Saint Frances Convent	7	473060	Baltimore, MD (City)	0.086351482	NE
10	McIlree, Carolyn D MD	3	192000	Baltimore, MD (City)	0.088784518	SE

Standard output on any Location Lists report, regardless of data source:

**AreaName:** The name of the input trade area where the data is located. In this example, the trade area is Baltimore City, Maryland.

**DistanceMiles/DistanceKilometers:** The distance measure of the location from the centerpoint of the trade area. In this example, the business in row one is 0.04 miles from the centerpoint.

**Direction:** The cardinal direction of the location from the centerpoint of the trade area. For example, Eager St Academy is east of the centerpoint of Baltimore City.
