

ClickScapes Summary Profile - Time Periods

The PRIZM segment composition of a Variable (individual mobile apps and websites including interest categories) for a specified time period. The data is available for weekly and monthly time periods. The output contains data for counts of visitors and number of visit days for each variable across each time period selected. Two files are created for each area of interest selected: a PDF document and an Excel file.

PRIZM Profile | ClickScapes Aggregated Time Periods

ENVIRONICS ANALYTICS

Variable: 2021 - January - Home Internet - Website - airbnb.ca (Visit Days)

The **Variable** that the report is ranked against is at the top of the report.
Note: The time period for the report is indicated alongside the variable.

The bar chart represents the Index value. An Index of 100 is average. Indices above 100 are above average or over-represented. Indices below 100 are below average or under-represented. Target Segments are usually identified by selecting segments with significant % and high Indices.

Note: The bar chart and values are based on the number of ClickScapes variables, for the PRIZM segment composition for an aggregated set of time periods.

Benchmark: Mississauga, ON (CY)

The **Benchmark**—also referred to as the base—is indicated at the bottom of the report.

SG: Each segment is assigned to one Social Group (SG) based on the urban-rural context, home language (English, French and non-official), affluence, family status, age of maintainer and ethnicity. The SG's are : Urban (U), Urban Fringe (F), Suburban (S), Town (T), or Rural (R).

LG: The Lifestage Groups (LG) categorize household composition according to the presence of singles, couples and families. The LG's are Young (Y), Family (F), and Mature (M).

Code: An integer assigned to each segment.

Name: The name of the PRIZM segment.

Count: The number of people or households in the segment who exhibit that behavior.

%: (Count/Total Count * 100) The weighted proportion of the population or households in each segment that exhibits that behavior.

Base Count: The number of people or households in the benchmark who exhibit that behavior.

Base %: The percentage of the population or households in the benchmark that exhibit that behavior.
